

BOON cheat sheet. It is recommended to read the M-x boon-tutorial to make sense of this. The color of a key indicates the type of argument it expects.
Command mode bindings.

esc back to normal mode											
Q	D qsearch-previous	R qsearch-next	W kmacro-end-or-call-macro	B	J find-char-forward	F	U backward-paragraph	P forward-paragraph	K switch-mark-quick	:	
q quote-character	d backward-search	r forward-search	w occur	b reserved	j find-char-backward	f beginning-of-line	u previous-line	p next-line	k switch-mark	; end-of-line	
A swap-region	S kmacro-start-macro	H yank-pop	T treasure-region	G	Y ace-jump-char-mode	N smarter-upward	E	O	I smarter-downward	"	
a enclose	s substitute-region	h splice	t take-region	g replace-by-character	y ace-jump-word-mode	n smarter-backward	e backward-char	O forward-char	i smarter-forward	' toggle-mark	
Z	X highlight-regexp	M	C open-next-line-and-insert	V copy-to-register	K switch-mark-quick	L	< beginning-of-buffer	> end-of-buffer	?		
Z undefined	X reserved	m c-god	C set-insert-like-state	v insert-register	k switch-mark	I	, beginning-of-expression	. end-of-expression	/		
space select region											

Left-hand text region specifiers:

q select-outside-quotes	d select-word	r select-word	w select-paragraph	b
a select-borders	s select-justline	h select-wim	t	g select-document
Z select-content	X select-outside-pairs	m select-inside-pairs	c	v

Color corresponds to the type of expected argument:

- (Reserved key)
- (Prefix map)
- A region
- A search space
- A character
- No Argument
- First an enclosure, then a region
